PROJECTS

Capgemini – An app for freshers

April-2021

- As a fresher, New employees have a lot of trouble. They don't know where to find pathways link and how to download payment slip. They also don't know their attendance status. So I tried to make one simple prototype for an app that solve all the problems of new joiners.
- Features:**
- Signup, Login, My Profile, Batchmates, Month wise attendance, Pathways, Payment Slip, Support, Logout.
- Technologies Used:** Figma

Explore India – Responsive Website

March-2021

- Build a complete **responsive** website using **Wix**.
- I think everybody should know about their country, that's why I am making this website. here, I am providing some coolest facts about **INDIA** on this website. Let's explore with one click. Currently, I hosted this website on the WIX platform.
- Technologies Used:** HTML, CSS.
- [Explore India](#)

EDUSPHERE – E Commerce Website

Oct 2019 – Jan 2020

- Currently there is no existing **shopping website** for only educated related items. **Education** is most important domain for society and also for business.
- So, decided to build (localhost) one complete platform using famous framework (**Magento**) for specially **e-commerce**.
- SMS services, Sales Reports, ordered products data, Discount coupon codes
- Technologies Used:** HTML, CSS, Magento Framework, PHP, phpMyAdmin, SMS API
- [PPT](#) and [Demo Video](#)
